Experience

- **Programmed Crowdsupply.ca** March 2020 - Current
Co-founder/Programmer
Mississauga, ON
Released a website that helps people track the lines and stock availability at stores near them
Utilized Cloud Firestore, Cloud Functions, Nodemailer API, Mapbox Geocoder API, Chart.js with Geohash technology to develop a functional and responsive webpage.
- **Junior Achievement Central Ontario** September 2019 to Current
Vice President of Production of the Business
Mississauga, ON
Created plans for producing the product, ran meetings, built supply lines, and organized other members.
I also designed and created the website.
- **FIRST Robotics Competition** November 2017 to Current
Mississauga, ON
Apart of 1325 Inverse Paradox.
Build the robot, used Solidworks to design parts, and scouted other teams
- **The Libertas Tribune** July 23th 2020 - Current
Chief Technology Officer
Mississauga, ON
I direct and guide the development team with web events and design and program the site.
- **AI Researcher at University of Toronto**
Researching under Dr. Brad Bass with the COBWEB Artificial Intelligence software. Creating an Artificial Intelligence model and using COBWEB to depict the data in a 2D simulation for the relation between trees and climate change.
- **Medical Clinic** October 2018 to Current
Youth Volunteer Leader
Mississauga, ON
Printed out HCV sheets, scanned Health Cards, organized files, taught, and lead other newer volunteers.
