EDUCATION

University of Waterloo

Bachelor of Applied Science - BASc, Management Engineering

Relevant Courses: Data Structures & Algorithms, Software Design & Databases, Intro to Machine Learning

Waterloo, ON

Sept. 2022 – May 2027

EXPERIENCE

Back-End Engineer Intern

Ground News

May 2025 – Aug. 2025

Toronto, ON

- Reduced average **Elasticsearch** query response time by **30%** through refactoring aggregations in **TypeScript**, integrating **Redis index caching**, and optimizing search mappings.
- Restored email subscription reliability to support **over 50,000 monthly users** by diagnosing and resolving a **MySQL token generation** bottleneck.
- Developed bias analysis module by designing and integrating a story bias scoring algorithm into the **Node.js content workflow**, improving output by processing an additional **1,000+ stories per day**.

Software Engineer Intern

Magnify Digital

Sept. 2024 – Mar. 2025

Vancouver, BC

- Used **Next.js** with **TypeScript** for server-side rendering and integrated **Node.js APIs**, reducing page load times by **20%** for **10K+ weekly visitors** and improving user retention.
- Re-architected data ingestion flows using **GraphQL** and **TypeScript**, enhancing system reliability by **30%** and enabling real-time analytics for marketing campaigns.
- Implemented end-to-end testing with **Cypress** and GitHub Actions, raising test coverage for critical user flows and significantly **reducing 50% of manual QA** cycles and helped enable more frequent, safer deployments.

Software Engineer Intern

ShyftLabs

May 2024 – Aug. 2024

Toronto, ON

- Built a responsive dashboard with **Next.js** and **React**, delivering real-time data visualization for a large-scale ad platform with **50K+ daily impressions**.
- Employed **Kotlin & Spring Boot** microservices integrated with **GraphQL**, reducing average response times by **10%** and improving data flow.
- Developed secure **REST APIs** using **Node.js** and **GraphQL** to enhance ad analytics, identifying data inconsistencies and **optimizing system reliability** for a **high-traffic dashboard**.

Full-Stack Engineer Intern

Wenu

June 2023 – Sept. 2023

Toronto, ON

- Designed secure payment processing using the **Stripe API**, achieving **PCI compliance** and protecting **thousands of customer records**.
- Developed backend logic in **SQL/PHP**, optimizing payment transactions by **80%** and enhancing the **React.js user experience**.
- Utilized **Cypress** and **Sentry** for debugging and monitoring, reducing error resolution time by **40%** and improving overall **platform reliability**.

PROJECTS

Beacon | Python, Flask, MongoDB, React, Redux, SCSS

- Developed a community-sourced platform for tracking local store inventory and wait times during supply shortages. Built a Flask API with robust input validation, designed MongoDB schemas for geolocated reports, and implemented a React/Redux frontend with real-time updates and moderation tools to ensure data quality.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML/CSS, TypeScript, Kotlin, VBA, R, GraphQL

Frameworks & Libraries: React, Redux, Node.js, Vue.js, Next.js, Tailwind, Express, Ruby on Rails

Databases & Caching: MongoDB, PostgreSQL, Firebase, MySQL, DynamoDB, Redis, Elasticsearch

Tools: Git, Docker, Kubernetes, Confluence, Cypress, Sentry, Figma, Jira
